

Hip Injuries

Learning Objectives

- This resource will focus on hip osteoarthritis (OA), labral tears and Femoroacetabular Impingement (FAI).
- A brief introduction to the anatomy of the hip and pelvis.
- Clinical features to help differential hip OA, labral tears and FAI.
- Reminder of the features needed to diagnose OA clinically.
- Investigations to consider when presented with a potential hip injury.
- Management options for hip OA, labral tears and FAI.
